Process Insight
Improve to Win

K2 SMARTFORMS

A smarter way to interact with people and processes

- Browser-based, drag-and-drop responsive designer
- Build a form once and re-use it anywhere
- Connects with LOB & data systems
- Validation using built-in logic, rules, & checks
- Works on any device, online or offline
- Can be hosted within third-party solutions

FORMS: Feature-rich forms

Rich UX from multiple data sources

Powerful business rules for data validation and dynamic display logic

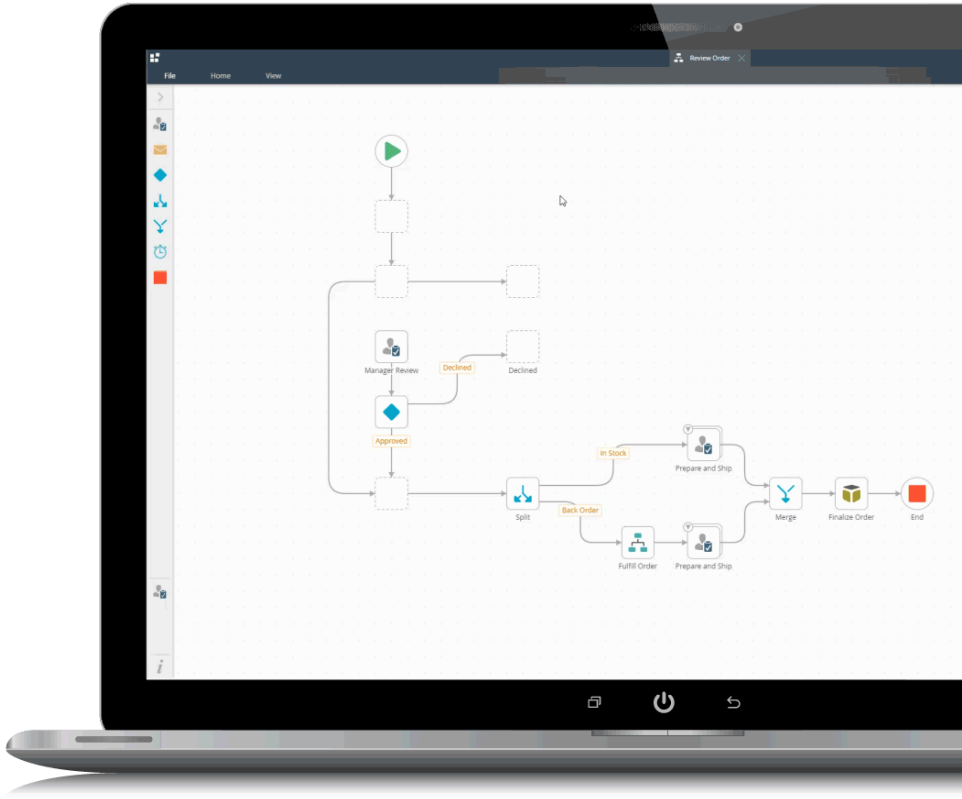

Web Application Compatible with any browser

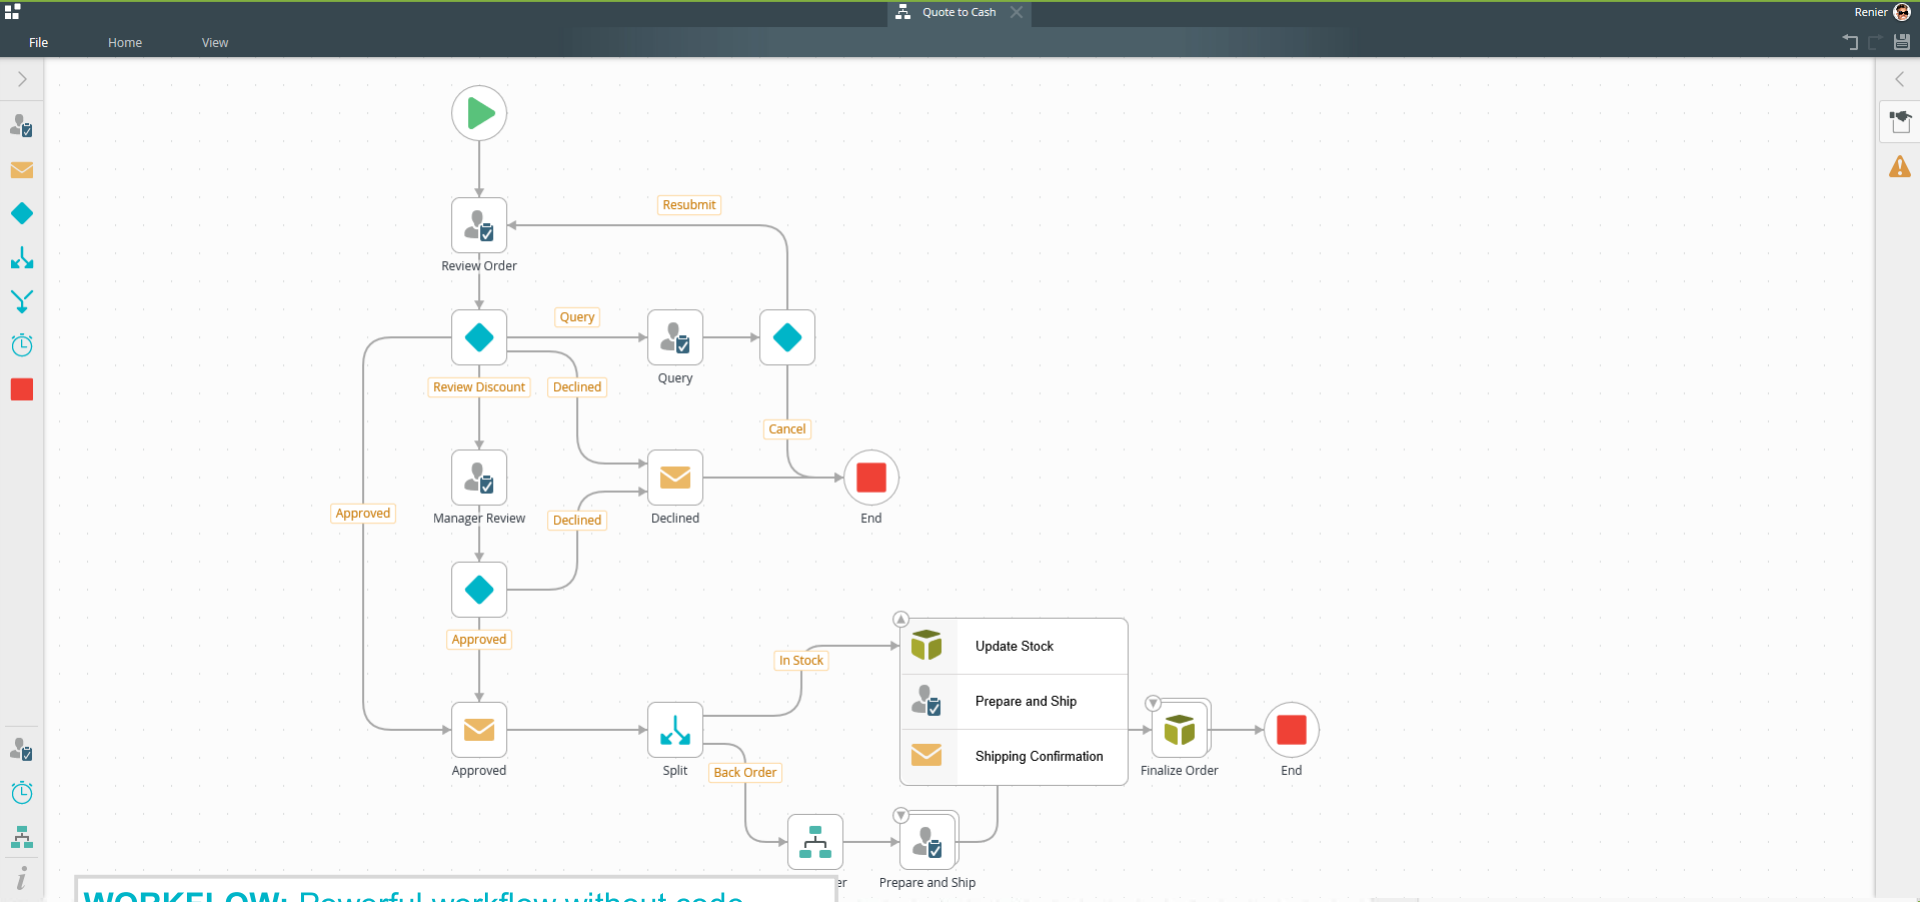

Build a form once, Use on any device

K2 WORKFLOWS

Span people and systems

- Eliminate silos with little coding
- Using intuitive drag-and-drop designers
- Re-useable across many applications
- Built-in logic and rules
- Enterprise class workflows that streamline and automate processes

WORKFLOW: Powerful workflow without code

Visually design complex or simple workflows

Incorporate business rules

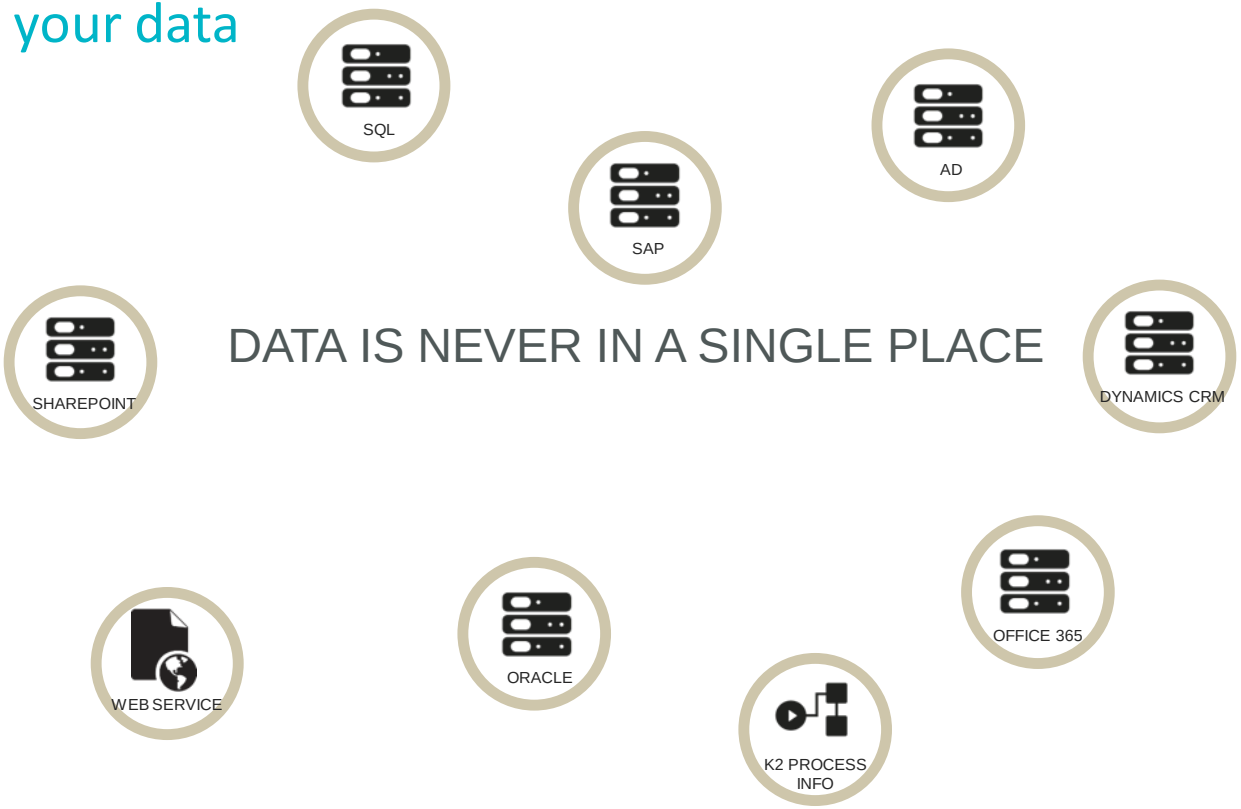

Drive process with escalations, reminders

Real time workflow validation

Smart Assist that accelerates design

K2 SMART OBJECT
